ELMO webexpenses ☁ + Microsoft Dynamics 365 **Business Central**
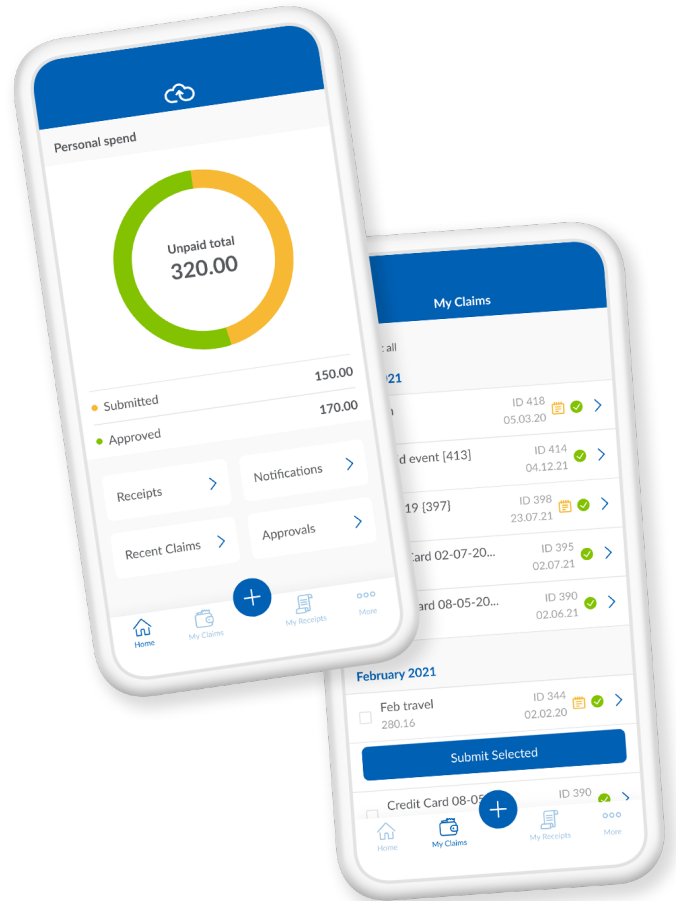

Webexpenses & Microsoft Dynamics 365 Business Central Integration

Webexpenses integration with Microsoft Dynamics 365 Business Central allows us to synchronise and transfer data between the two systems, including:

- Auto synchronisation of tax, customers, vendors and cost centres
- User provisioning using Dynamics 365 Business Central as the primary source of data
- Configurable transfer for personal and credit card spend
- Google Vision-powered OCR technology to scan and upload receipt data

Common client challenges

| Poor visibility on T&E spend | Unable to maximise VAT reclaim | Reducing expense processing costs | Fully eliminating a paper-based process |

Why Webexpenses

Webexpenses is a leading expense management provider with over a billion expenses claimed worldwide and 98% client retention. But what makes Webexpenses different?

24/6 support
Support is in-house, easily accessible, and available to all users at no extra cost.

Custom configured
We meet your specific business requirements, with a dedicated account manager.

Transparent pricing
Only active users will be charged a flat, monthly fee.

Scalable
Our in-house dev team releases over 100+ updates and feature upgrades per year.
